

The international benchmark for sustainable paper!

The facts about Forest Stewardship Council (FSC)

FSC is the most credible international certification for paper and timber products.

Buying FSC products supports the growth of responsible forest management worldwide.

- FSC is the fastest growing forest certification in the world with 123 million hectares certified across 82 countries, representing the equivalent of 5% of the world's productive forests.*
- Forests are inspected and certified to strict standards and must be managed in an environmentally sound, socially beneficial and economically viable way.
- Finsbury Green, a Chain of Custody certified printer, purchases FSC certified paper and tracks the path taken by the raw material from the sustainable forest to the consumer.
- Clients can publish the FSC trademark on printed product as a sign of their commitment to an eco-advantaged product.
- Increasing numbers of designers, marketers and buyers of print specify FSC certified papers and printers.
