

The smart way to make artwork print ready!

The facts about printeagle

printeagle is Finsbury Green's online preflight, correction and artwork conversion application for designers and creatives.

- printeagle processes any file format.
- Seamlessly flight checks and creates a high resolution, print-ready PDF.
- Automatically embeds fonts, applies Finsbury Green's ISO12647 colour management standard, flattens transparencies, removes four-colour blacks and converts RGB to CMYK, on the fly.
- A report notifies the client and Finsbury Green staff that the file has been processed and provides a link to a low resolution PDF proof of the print-ready version.
- Any problems are identified in a report and problematic images or elements are visible in a separate layer.
- printeagle can be found at www.finsbury.com.au with a Helpdesk available on the log-in page.
- Saves time, money and resources by providing a sustainable solution.
- Suits broadband users or anyone currently using FTP.
- Upload data limit of 1GB.
- Processes jobs faster, safer and smoother than ever before.

For example:

MB	50	100	200	500	1GB
Mins *	4	7	13	33	65

* Upload speeds are indicative only and are based on ADSL 2Mb per second broadband configuration
